ASSAYS FOR FIRST THREE DRILL HOLES OF THE RECENT DRILL PROGRAM INTERSECT NEAR SURFACE MINERALISATION

- **DRILL HOLES 11WW219 AND 11WW220 DRILLED AT WHITEWASH HILL INTERSECT SIGNIFICANT NEAR SURFACE HIGHER GRADE MINERALISATION WITH GOOD COPPER GRADES AND SOME EXCEEDING 1%.**
- **DRILL HOLE 11WW221 DRILLED 100M EAST OF THE 242MT RESOURCE HAS INTERSECTED SIGNIFICANT MINERALISATION WITH COPPER GRADES UP TO 0.6% AND EXTENDS THE WIDTH OF THE KNOWN MINERALISATION BY A FURTHER 100M.**

Hole 11WW219:

Best near surface assays include:

**50m @ 0.21% Copper, 0.015% Molybdenum, from 3m
Including 3m @ 0.97% Copper 0.03% Molybdenum & 8.0 g/t Silver, from 51m**

Best deeper mineralisation includes:

**5m @ 0.24% Copper, 0.012% Molybdenum & 1.2g/t Silver, from 181m
5m @ 0.27% Copper, 0.026% Molybdenum, 2.2g/t Silver & 0.011% Tungsten from 198m
25m @ 0.15% Copper, 0.064% Molybdenum and 1.2g/t Silver, from 241m**

As well as numerous other intersections. (See assays attached to this announcement)

Hole 11WW220:

Best near surface mineralisation includes:

53m @ 0.21% Copper, 0.056% Molybdenum & 2g/t Silver, from 32m

Best deeper mineralisation includes:

**5m @ 0.18% Copper, 0.07% Molybdenum & 2g/t Silver, from 172m
26m @ 0.22% Copper, 0.02% Molybdenum & 2.3g/t Silver, from 183m**

As well as numerous other intersections. (See assays attached to this announcement)

Aussie Q Resources Limited (ASX:AQR) today announced that the assays from the first three drill holes, (219, 220 and 221) in the recent drilling program have been received. The first two of these drill holes were designed to test for further near surface higher grade mineralisation. This mineralisation could potentially add to the other near surface zones assisting with early cash flow in any proposed mining situation. Holes 219 and 220 have achieved the objective set out when the holes were planned. Further holes will be drilled in this area to better delineate this newly discovered high grade zone. These new holes will be incorporated into a revised Resource Estimate when sufficient new drill data are available.

Step out drill hole 221 encountered significant mineralisation, it was drilled toward the east and collared at 7254500mN / 0285350mE and is positioned 100m east of drill hole 31. The mineralisation in this drill hole extends the known mineralisation a further 100m to the east of the 242mt Resource (announced on 30 & 31 May 2011)* and provides further confirmation that the Greater Whitewash mineralisation is open to the east. It is also worth noting that copper appears to be the more dominant metal as drilling advances to the east.

Aussie Q Limited Executive Director, John Goody said: "While we are only in the early stages of new drilling at Whitewash, we are encouraged by what we have encountered in the first drill holes. The latest assays confirm similar or higher grade mineralisation to that encountered in the 85 million tonne high grade section of the present Resource with significant sections exceeding 0.1% MoEq** (1,000ppm MoEq) and will add to those tonnes".

The collars of drill holes 219 and 220 were positioned at 7254488mN / 0285042mE and 7254453mN / 0285146mE respectively. Both holes had an azimuth of 0° Mag and both were drilled with a dip of -55°.

The drill holes shown in the figure below with green collars were included in the 242mt Resource. The new drill holes (219, 220 & 221) are shown in the figure below with yellow collars and were not included in the 242mt Resource.

Yours sincerely,

John Goody
Executive Director

* The Resource at Greater Whitewash was reported by independent consultants SRK as 242 million tonnes grading at 604ppm MoEq based on a 425ppm MoEq cut off, the Resource includes 85mt grading 808ppm MoEq. The resource calculated by SRK at Greater Whitewash includes over 76% in the "Indicated Resource" category.

** The MoEq formula is; $MoEq = Mo + Cu/3.8 + Ag*28.8$

This is based on the following metal prices

Mo = US\$31 600 /t

Cu = US\$8 300/t

Ag =US\$28.37 /troy Oz, and assumes equal process recoveries for all three elements.

The information in this report that relates to exploration results and mineral resources is based on information compiled by John Leslie Goody, Executive Director of Exploration, Aussie Q Resources Limited and supervised by Dr. Richard Haren who is a Member of The Australasian Institute of Mining and Metallurgy and who has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity undertaken to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr. Richard Haren is a self employed consultant who consults to AQR and has consented to the inclusion in this report of the matters based on this information in the form and context which it appears.
