Dear Madam,

## **Report on Activities and Appendix 5B – June Quarter 2008**

The Company is pleased to provide the following report on activities for the three month period ending 30<sup>th</sup> June, 2008.

### **HIGHLIGHTS**

- **Assays from the infill drilling program at Whitewash Copper / Molybdenum Prospect (EPM 14628 – AQR 100%) west of Monto in Central Queensland continued to be reported during the quarter and all the data has now been released to the market.**
- **During the June Quarter the Company spent approximately \$1.274 million on drilling and exploration which was 81% of the total amount expended.**
- **All of the assay data and other recorded geo-scientific data are with the independent consultants who are working on the production of a Geographic Information System (GIS) database and the Whitewash resource statement.**
- **Assays from drilling at Gordon's Knob (the northern extension of Whitewash) provided broad highly significant continuous Mo intercepts including – 08WW075 - 143m width average grade 0.10% Mo and 0.07% Cu and – 08WW073 – 77m width average grade 0.05% Mo and 0.08% Cu.**
- **A 3000m / 12 hole diamond drilling programme at Gordon's Knob was announced in mid July.**

### **Whitewash infill drilling reporting**

The Company is pleased to announce that all of the assay data from the 2007 and 2008 drilling programmes at Whitewash (EPM 14628 – 100% AQR) has been received and reported to the market. These data are all in the hands of our independent consultants who are working on the resource statement. Further drilling at Whitewash will be considered once the resource statement is available.

## **Drilling and exploration expenditure \$1.274 million during the June Quarter**

The drilling and exploration expenditure during the quarter was down on the previous quarter because it was decided to suspend drilling until all of the assay data backlog was cleared and to have all other available data at hand prior to designing and initiating another drilling programme at Whitewash. The Company has cash reserves of \$5.895 million and is comfortable with the fact that it has the financial capacity to continue the exploration and development of the wider Rawbelle Project Area.

### **Resource statement and GIS database**

The independent consulting company appointed to prepare the Whitewash resource statement has decided that the development of a Geographic Information System (GIS) database consisting of all the available geology, geophysical data, the alteration geochemistry and mapping data is necessary to assist in unravelling the complexity of the Whitewash structure. The GIS database will also assist in planning further infill and expansion drilling at Whitewash. At present the Company is expecting some definitive data regarding the Whitewash resource in the next four weeks.

### **Gordon's Knob assay results**

Assay data for Gordon's Knob, the northern extension of Whitewash which were released towards the end of the June Quarter were highly significant with very broad Mo intersections encountered. The style of mineralisation at Gordon's Knob is different from that seen at Whitewash. The data from Gordon's Knob will not be included in any preliminary resource statement due to the different style of mineralisation. However, it is anticipated that the initial drill results of the mineralisation at Gordon's Knob, together with the results of the new drilling programme at that site would increase the overall size and grade of the potential resource at Whitewash.

### **3,000 metre drilling programme announced for Gordon's Knob**

The Board has announced that an extra 3,000 metres of diamond drilling will be sited at Gordon's Knob starting in mid August. A programme of a minimum of 12 HQ diamond drill holes is planned for the 3,000 metres, and this will be extended if the drill core continues to be significantly mineralised.

### **Reporting**

The Company after reviewing the practices it has followed in disclosing its exploration results has decided to vary the format used in past announcements. The Company will no longer report with respect to metals other than molybdenum on a molybdenum equivalent basis. Further, the Company will discontinue the practice of reporting the average grade and molybdenum equivalent of selected metres from holes. Grade of mineralisation in particular holes better than a stated cut off will be presented by reference to the applicable depth in the hole.

The Company has reformatted all of its 2008 exploration results on the above basis and these are attached to this report in Table 1 (see also Note 1).

## **Appendix 5B**

The Company's Appendix 5B cash report is attached

Yours sincerely,

Dr Richard Haren  
CEO

*The information in this report that relates to exploration results is based on information compiled by John Leslie Goody, Executive Director of Exploration, Aussie Q Resources Limited and supervised by Dr. Richard Haren who is a Member of The Australasian Institute of Mining and Metallurgy and who has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity undertaken to qualify as a Competent Person as defined in the 2004 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Dr Richard Haren is a self employed consultant who works for AQR and has consented to the inclusion in this report of the matters based on his information in the form and context in which it appears.*

## Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
