Dear Madam,

Report on Activities and Appendix 5B - March Quarter 2010

Exploration Activities

During the period January 1 to March 31, 2010 the Company has been drilling exclusively at Whitewash South on EPM 14628 (100% AQR owned). Two drill rigs have been active at Whitewash South, with a Reverse Circulation rotary hammer (RC) rig drilling pre-collar holes to around 200m for the Diamond Core rig to continue the drilling to a minimum of 350m depth. Numerous drill holes have exceeded the design depth of 350m because of good mineralisation being encountered in the holes.

During the quarter, the Company drilled a total of 2,075.2m of RC and 2,667.8m of Diamond core for a total of 4,743m. In all, 16 holes were spudded and 12 were completed. Drilling is continuing and results during the quarter have revealed large mineralised intersections in many of the drillholes. As results have become available they have been released to the ASX. The Whitewash South mineralisation is a few hundred metres south of the 71.5million ton inferred Mo/Cu resource already announced to the market at Whitewash/Gordons. Drilling during the current quarter will facilitate the collection of data that will join the initial

resource discovery to the north with the Whitewash South mineralisation that is presently being assessed by drilling.

Analysis of the available Whitewash South drilling data shows that the mineralisation is associated with multiple intrusive events, each potentially increasing the average grade of the mineralisation and its overall size. Aggregate intersections in drill holes include;

097D - 200m 586ppm Mo and 0.14% Cu,

098D - 101m 465ppm Mo, 0.16% Cu and 118ppm Tungsten,

099D - 100m 601ppm Mo, 0.11% Cu and 120ppm Tungsten,

101 - 132m 430ppm Mo, 0.19% Cu and 122ppm Tungsten.

Complex mineralised breccias and gaseous phase rock units have been drilled at Whitewash South and indications are that beneath the present drilling a large scale mineralised intrusive zone is in place. The areole surrounding the deep intrusive has been breached at depths exceeding 500m and suggestions are that Whitewash South hosts a complex large scale mineralised system at depth as well as in the near surface. At present the Company is working on drilling the region between Whitewash South and Whitewash to determine if the two mineralised systems are continuous.

The Company has also been actively assessing other prospective regions of the EPMs held to the west of Monto in Queensland. As well a number of new opportunities have been presented and these have been reviewed. Discussions with a number of parties regarding the continued funding of the Company's exploration programs have also been initiated.

Corporate

On 30 January 2010 the Company's unlisted series of options, each exercisable at 30 cents expired. Prior to expiry, 1,749,260 of these options were exercised. During February, the Company completed a placement of an aggregate of 6,866,666 shares raising \$2 million (after costs) to supplement the Company's working capital. On 14 April 2010, Frank Gardiner retired as a non executive Director and Chairman of the Company and the continuing Directors thank him for his contribution to the Company.

The Appendix 5B is attached.

Yours faithfully

John Goody
Executive Director

Notes

- 1 The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity wanting to disclose additional information is encouraged to do so, in a note or notes attached to this report.
- 2 The "Nature of interest" (items 6.1 and 6.2) includes options in respect of interests in mining tenements acquired, exercised or lapsed during the reporting period. If the entity is involved in a joint venture agreement and there are conditions precedent which will change its percentage interest in a mining tenement, it should disclose the change of percentage interest and conditions precedent in the list required for items 6.1 and 6.2.
- 3 **Issued and quoted securities** The issue price and amount paid up is not required in items 7.1 and 7.3 for fully paid securities.
- 4 The definitions in, and provisions of, *AASB 1022: Accounting for Extractive Industries* and *AASB 1026: Statement of Cash Flows* apply to this report.
- 5 **Accounting Standards** ASX will accept, for example, the use of International Accounting Standards for foreign entities. If the standards used do not address a topic, the Australian standard on that topic (if any) must be complied with.
